

# Timber Fire Doors Explained

# 2010

A seminar and fire test demonstration day designed to present an overview of fire door design, manufacture, testing, installation and certification.

**2010 Dates** Thursday 18 February  
Thursday 13 May  
Thursday 23 September  
Thursday 11 November

**FIRE DOORS SAVE LIVES AND PROTECT PROPERTY, SO IT IS ESSENTIAL THAT THEY ARE MANUFACTURED, INSTALLED AND SPECIFIED CORRECTLY.**

**Through demonstrations, videos and seminars, Chiltern International Fire will explain timber fire door construction, testing, installation and certification:**

- How fire doors are tested, assessed and certified
- How to install a fire door correctly
- Issues which will determine success or failure in achieving the required performance of fire resisting doorsets

**The day is aimed at:**

- Fire door manufacturers and suppliers
- Construction companies and installers
- Facilities and estate managers
- Architects and specifiers
- Approved inspectors and building control officers

**Chiltern International Fire**

Chiltern International Fire is a UKAS (United Kingdom Accreditation Service) accredited fire test laboratory and consultancy with over 35 years' experience of serving the fire safety needs of the building industry. A wide range of products can be tested to European, British and International standards for fire resistance and reaction to fire.

The consultancy division can assist clients by developing test programmes, witnessing tests, producing assessments and providing onsite evaluations, allowing us to offer a full range of services from one single source. In addition, sister company Chiltern Dynamics, offers a wide range of mechanical testing services for building products.

**BM TRADA Certification**

BM TRADA Certification is a leading multi-sector certification body accredited by UKAS.

BM TRADA Certification's portfolio of services includes certification of quality, environmental, information security, health & safety management systems, as well as product and personnel schemes.

BM TRADA Certification operate Q-Mark product certification schemes for a range of building products (including fire door manufacture and installation). Q-Mark offers manufacturers and specifiers increased assurance that products will perform as specified.

### Pricing

£275 + VAT (TRADA member)  
£310 + VAT (Non-member)

### 2010 dates

Thursday 18 February  
Thursday 13 May  
Thursday 23 September  
Thursday 11 November

### Venue

**The event is run at Chiltern International Fire's test facility in High Wycombe, Buckinghamshire. Our offices are located close to Junction 4 of the M40 motorway and approximately 30 minutes from London Heathrow.**

### Availability of places

The days have proved to be very popular and the courses are often over-subscribed. To ensure your place, we would advise you to book as far in advance as possible.

If there is sufficient demand, additional courses may be run. Please contact us to check the latest dates and availability or to register your interest in future courses, call +44 (0) 1494 569685 or email [training@chilternfire.co.uk](mailto:training@chilternfire.co.uk).

For companies and organisations where significant numbers need training, or it would be difficult to attend our test facilities, we also run an "On the Road" version of the seminar. For further details please contact us.

### Related training

Chiltern International Fire is part of the BM TRADA Group of companies which also includes TRADA Technology and BM TRADA Certification.

Between us, we run a large number of training courses on a wide range of subjects.

Please visit [www.chilternfire.co.uk/training](http://www.chilternfire.co.uk/training) for further details or call +44 (0) 1494 569685.

## Event programme

**10:00 – 10:20**    **Arrival and coffee**

**10:20 – 10:30**    **Introduction**

**10:30 – 11:00**    **Background to the test requirements**

An explanation of where the requirements for fire testing originate. The effect of the RRFSo. The role of fire doors for life safety and property protection.

**11:00 – 11:30**    **Anatomy of fire resistant doorsets**

The function of components in a fire resistant doorset

- ▶ leaves
- ▶ frames
- ▶ intumescent seals

**11:30 – 11:50**    **Coffee break**

**11:50 – 12:10**    **Anatomy of fire resistant doorsets (cont.)**

The function of components in a fire resistant doorset

- ▶ hardware
- ▶ glazing

**12:10 – 12:40**    **Installation and maintenance of fire doors**

Demonstration of the key issues when installing fire resistant doorsets. The importance of maintenance.

**12:40 – 1:10**    **Fire testing, test reports and the role of assessments**

How fire doors are tested. The role of global and job specific assessments in extending the scope of the fire test report.

**1:10 – 1:50**    **Lunch**

**1:50 – 2:20**    **Third party certification and the Q-mark scheme**

The value of third party certification. BM TRADA Certification schemes for timber door manufacturers and installers.

**2:20 – 3:40**    **Witness full scale one hour fire resistance test**

Two single doorsets will be tested, one correctly constructed and installed, the other with built in errors, to highlight the effect mistakes can have on fire resistance. Live commentary by a senior fire test engineer and post test examination of the doorsets.

**3:40 – 3:55**    **Q&A with the Panel**
